

1 Amendment to the Claims

2 In the Claims:

3 Please amend Claims 1, 2, 5, 6, as follows:

4 ^{Sub} B1 1. (Currently Amended) A method for providing a selection of properties for an
5 electronic document associated with an application program having a user interface, comprising the
6 steps of:

7 determining a context for the electronic document;

8 determining a status of a property for the electronic document; and

9 based upon the context of the electronic document and the status of the property,

10 creating a palette for the user interface so that the palette comprises a control
11 for an available property; and

12 displaying the palette in conjunction with the electronic document on the user
13 interface.

14 2. (Currently Amended) The method of Claim 1, further comprising the steps of:

15 determining a change in the status of the property or the context of the electronic
16 document;

17 based upon the change of the property or the change in context of the electronic
18 document,

19 modifying the palette to reflect the change in the property or the change in the
20 context of the electronic document; and

21 replacing the palette with the modified palette so that the modified palette is
22 displayed in conjunction with the electronic document on the user interface.

23 3. (Original) The method of Claim 1, further comprising the step of:

24 sizing the palette so that the palette and the electronic document can be simultaneously
25 viewed.

26 4. (Original) The method of Claim 2, further comprising the step of:

27 sizing the modified palette so that the modified palette and the electronic document
28 can be simultaneously viewed.

1 5. (Currently Amended) The method of Claim 1, further comprising the steps of:
2 coordinating the palette with a predefined interface so that the palette and the
3 predefined interface provide consistent control features; and
4 displaying the predefined interface in conjunction with the palette and the electronic
5 document.

6 6. (Currently Amended) The method of Claim 2, further comprising the steps of:
7 coordinating the modified palette with a predefined interface so that the palette and the
8 predefined interface provide consistent control features; and
9 displaying the predefined interface in conjunction with the modified palette and the
10 electronic document.

11 7. (Original) The method of Claim 1, wherein the context of the electronic document
12 consists of at least one of the following: textual content, formatting content, or graphical content.

13 8. (Original) The method of Claim 1, wherein the property consists of one of the
14 following: a formatting command, an application program command, or an electronic document
15 characteristic.

16 9. (Original) The method of Claim 1, wherein the user interface comprises a
17 graphical user interface for an application program.

18 10. (Original) The method of Claim 1, wherein the user interface comprises a floating
19 palette.

20 11. (Original) The method of Claim 1, wherein the user interface comprises a
21 property browser palette window.

22 12. (Original) The method of Claim 5, wherein the predefined interface comprises a
23 toolbar.

24 13. (Original) The method of Claim 6, wherein the predefined interface comprises a
25 toolbar.

26 14. (Original) A computer system for providing a selection of formatting properties
27 for an electronic document associated with an application program having a user interface
28 comprising:

29 a memory for storing a property browses program module; and
30

1 a processing unit functionally coupled to the memory for executing computer-
2 executable instructions operable for:

3 determining a formatting property for an electronic document associated with
4 the application program, wherein the formatting property has at least one control;

5 determining a context for the electronic document;

6 creating a palette with the formatting property including at least one control
7 and further based upon the context of the electronic document; and

8 sending the palette to a user interface associated with the application program.

9 15. (Original) The computer system of Claim 14, wherein the processing unit is
10 further operable for:

11 determining a change in the status of the property or the context of the electronic
12 document;

13 based upon the change of the property or the context of the electronic document,

14 modifying the palette to reflect the change in the property or the change in the
15 context of the electronic document; and

16 replacing the palette with the modified palette so that the modified palette is
17 displayed in conjunction with the electronic document on the user interface.

18 16. (Original) The computer system of Claim 14, wherein the processing unit is
19 further operable for:

20 sizing the palette so that the palette and the electronic document can be simultaneously
21 viewed.

22 17. (Original) The computer system of Claim 15, wherein the processing unit is
23 further operable for:

24 sizing the modified palette so that the modified palette and the electronic document
25 can be simultaneously viewed.

26 18. (Original) The computer system of Claim 14, wherein the processing unit is
27 further operable for:

28 coordinating the palette with a predefined interface so that the palette and the
29 predefined interface provide consistent control features; and
30

1 displaying the predefined interface in conjunction with the palette and the electronic
2 document.

3 19. (Original) The computer system of Claim 15, wherein the processing unit is
4 further operable for:

5 coordinating the modified palette with a predefined interface so that the palette and the
6 predefined interface provide consistent control features; and

7 displaying the predefined interface in conjunction with the modified palette and the
8 electronic document.

9 20. (Original) The computer system of Claim 14, wherein the context of the
10 electronic document consists of at least one of the following: textual content, formatting content, or
11 graphical content.

12 21. (Original) The computer system of Claim 14, wherein the property consists of
13 one of the following: a formatting command, an application program command, or an electronic
14 document characteristic.

15 22. (Original) The computer system of Claim 18, wherein the user interface
16 comprises a graphical user interface for an application program.

17 23. (Original) The computer system of Claim 18, wherein the user interface
18 comprises a floating palette.

19 24. (Original) The computer system of Claim 18, wherein the user interface
20 comprises a property browser palette window.

21 25. (Original) The computer system of Claim 18, wherein the predefined interface
22 comprises a toolbar.

23 26. (Original) The computer system of Claim 19, wherein the predefined interface
24 comprises a toolbar.

25 27. (Original) A computer system for providing a selection of formatting properties
26 for an electronic document associated with an application program having a user interface
27 comprising:

28 a memory for storing a property browser program module; and

29 a processing unit functionally coupled to the memory, for executing computer-
30 executable instructions operable for:

1 determining a formatting property for an electronic document associated with
2 the application program, wherein the formatting property has at least one control;
3 determining a context for the electronic document;
4 creating a palette with the formatting property including at least one control
5 and further based upon the context of the electronic document;
6 sizing the palette so that the palette and the electronic document can be
7 simultaneously viewed;
8 sending the palette to a user interface associated with the application program;
9 determining a change in the status of the property or the context of the
10 electronic document; and
11 based upon the change of the property or the context of the electronic
12 document,
13 modifying the palette to reflect the change in the property or the change
14 in the context of the electronic document;
15 sizing the modified palette so that the modified palette and the
16 electronic document can be simultaneously viewed; and
17 replacing the palette with the modified palette so that the modified
18 palette is displayed in conjunction with the electronic document on the user interface.
